

Do you want to save time on your tax processing procedures? Do you want to eliminate unnecessary paperwork and reduce your data entry?

Take advantage of today's technology! Let TriTech's EFX division automate one of your most expensive and time consuming operations - collecting and entering tax return data. Our EFX division is dedicated to helping state tax departments reduce the countless number of hours spent processing paper returns.

E-Filing Express is designed to benefit participating state departments by allowing companies to electronically file their premium tax returns using tax software. With a simple click of a button, taxpayers can send the tax return data to a secure server that can then be downloaded directly to your existing data structure. This provides a flexible and secure alternative to traditional paper filings. You can save time and expenses associated with error-prone manual entry of data. Currently, over 3,000 companies use TriTech's Premium Pro software to prepare their premium tax returns. With efficiencies gained by so many companies having access to a simple and cost-effective method of electronically filing their returns, the opportunities and possibilities are endless for your department.

Electronic filing via Premium Pro is a cost effective and efficient process that reduces data entry and places no or minimal additional burden on tax filers.

## ELECTRONIC FILING

You determine the information you wish to receive and we will design a custom data format that fits your needs and specifications.

- Eliminate the data entry process
- Reduce paper handling
- Easy to audit and proof tax returns
- Reject incomplete returns
- Generate customized reports
- Secure data encryption
- Data flexibility
- Save valuable resources and time
- Works with existing hardware and software

Additional features and functionalities can be incorporated as needed or required to meet your specific needs.

TriTech Software offers electronic filing via our Premium Pro software at no charge to the state or our clients

We would like the opportunity to discuss this with you further and provide you with any information you may want or need. We can also arrange to have a sample file format created from our software and sent to you for your review.
